## Detail work continues on Memorial Bridge

**Bismarck** – Crews with Rainbow, Inc. continue applying the finish coat to piers and barriers on Memorial Bridge. Crews will be working through the weekend.

Overhead on the bridge deck, crews with Lunda Construction are finishing curb and barrier work and preparing to install pedestrian rails. Work is also continuing on the approach areas, both on top and under the bridge. Crews are working on the modular block walls, sidewalks and plazas. Under the bridge, Strata Corporation is installing lights under the bridge on the piers.

The new bridge remains closed to the public. However, both the north sidewalk on the old bridge is open to pedestrians and the driving lanes on the old bridge remains open for vehicles.

Other work planned for the week of June 30-July 3:

- Stripping forms from pedestrian overhangs.
- Detail work on pedestrian overhangs.
- Setting and testing anchors for railing.
